

## DIVIDING & COLLECTING BREECHINGS

Dividing Breechings are used for distributing medium from one feed line over several hose lines, or in special cases for collecting it in the reverse direction. Collecting Breechings are used to combine two water feeds into a single line.

Collecting Breeching with 2 ½" instantaneous connections.

Dividing Breeching with 2 ½" instantaneous connections.

## CONTROLLED DIVIDING BREECHINGS

### With ball valves

Each hose line can be shut-off individually by means of a stop valve. The ball valve of the dividing breeching can be easily operated in the usual flow direction at 16 bar and in the opposite direction at 6 bar.

Style 2-3211 has 2 x 40mm ball valves

Style 3-3211 has 2 x 32mm and 1 x 40mm ball valves

Ref. 2-3211

Ref. 3-3211

Inlet	Outlet	Style	Weight
2 ½" M	2 x 2 ½" F	2-3211	4.000 kg
2 ½" M	3 x 2 ½" F	3-3211	5.350 kg
