

GATE VALVE

Gate Valves are used to provide excellent fire protection in multifloor buildings, generally 18 metres to 60 metres high.

They are manufactured to BS 5041 Part 2 in gunmetal BS1400 LG2.

Inlet Flange: 2 ½" or 3" Table D/E / PN16
Thread: 2 ½" BSP Male

Outlet: 2 ½" instantaneous female to BS 336

Optional Extras: Red Plastic strap and padlock for hand wheel.
