

FIRE HYDRANT GLOBE VALVES

GENERAL DESCRIPTION

Fire Hydrant Valves are suitable for both offshore and onshore application. They are manufactured to BS 5154 and BS 5041 part 1.

The valves are manufactured in corrosion resistant materials with an LG2 gunmetal body and are available with both British Instantaneous female outlet to BS 336 and a wide range of International outlets.

FEATURES

All the Fire Hydrant Valves are dual seat type. The primary valve seat is hard rubber with an additional secondary metal to metal seat.
