

HOSE RAMPS

Foco Safety Hose Ramps are constructed of solid reinforced rubber. All the usual features of trouble free reliability but with simple and foolproof interlocking connecting lugs that also serve as convenient carrying handles.

Each unit is 12" wide and you simply lock together as many units as necessary to give any required width of ramp.

The many advantages of Foco Safety Hose Ramps include:

- Special stepped construction for safe, smooth riding.
- Sustained Strength – made from solid reinforced rubber they withstand most vehicle loads.
- Hose protecting design – hoses become integral part of ramp completely avoiding risk of damage or interference with water flow
- Flexible base apron gives maximum 'ground grip' immediately wheels touch.

Weight approx. (26 lbs)
11.6 kilos
