

HOSE WINDING & BRUSHING MACHINE

Proper care of fire hose after use pays for itself in a very short time through increased hose life. Our hose winding and brushing machine, used extensively by fire brigades all over the world, performs the job neatly and efficiently.

A compact unit, it is designed to retain stability when operated by one man. The twin brushes are resilient and durable. The unit is designed for cleaning, brushing and rolling any size hose between 1 ¾" (45mm) and 2 ¾" (70mm).
