

RUBBER GLOVES

Industrial Gloves and Gauntlets.

These hardwearing gloves are used for many heavy duty applications where greater protection is needed. They can be used in certain deep immersion situations and for handling a wide range of acids and alkalis. The gloves are used in the chemical, engineering, brewing and agricultural sectors.

Standard: EN374 : 2003

EN388 : 2003

Size: 7 ½, 8 ½, 9 ½, 10 ½

Length: 430mm 610mm

Thickness: Medium Heavy
1.2mm 1.5mm

- Seamless and shaped for comfort and dexterity.
- Chlorinated to harden and cleanse the surface
- Hard wearing to provide economical wear.
- Unlined to allow easier cleaning, to guard against the absorption of most hazardous liquids and to meet agricultural standards.
- Abrasion, puncture and tear resistant.
- Produced with rolled cuffs to prevent dripping.
- Designed to reduce hand fatigue through curved fingers.
- Of a consistent high quality.
